CHANGE HISTORY

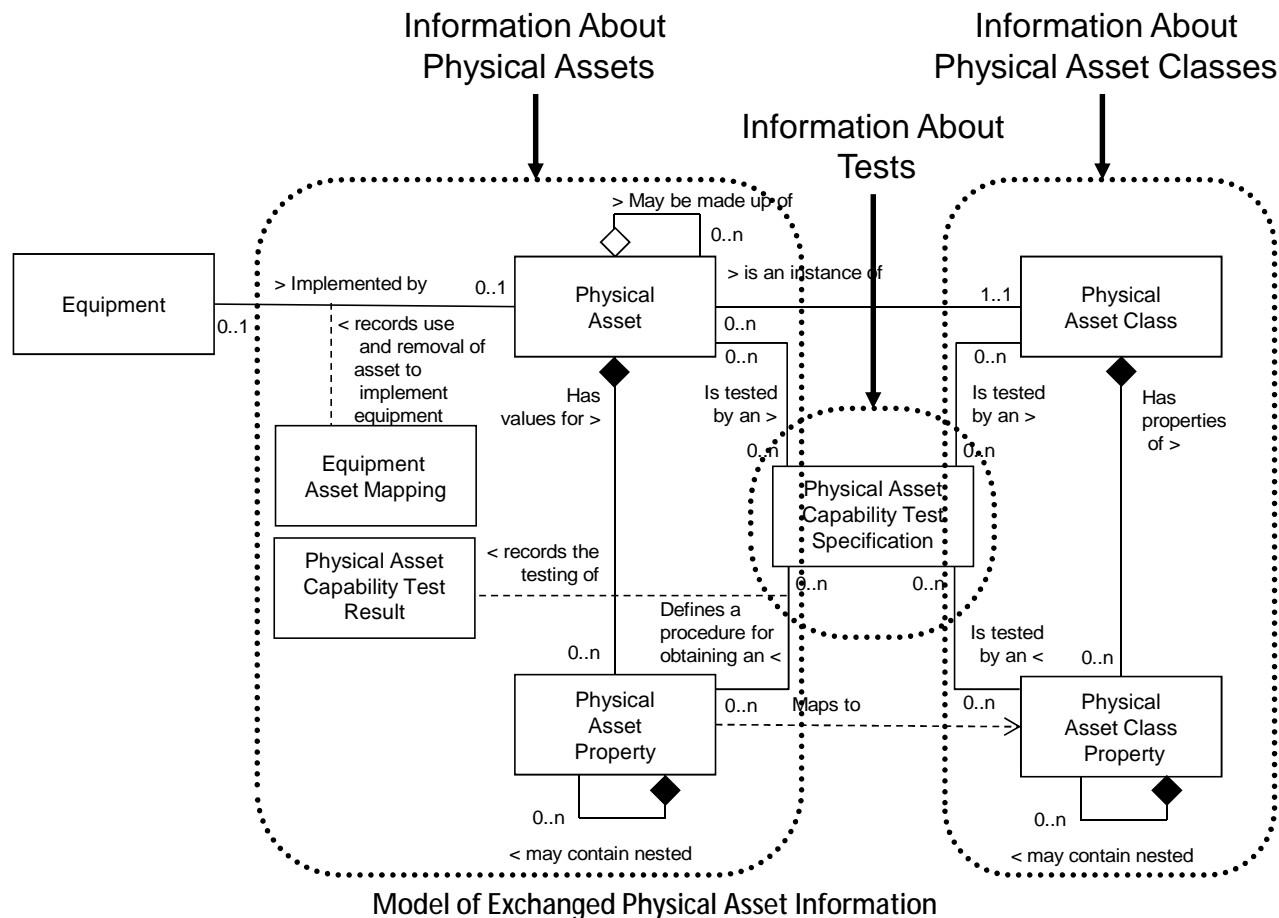

Change	Date	Person	Description
V0500	Mar 2011	Dennis Brandl	• Initial version to match ANSI/ISA 95.02-2010
V0600	Aug 2012	D. Brandl	Updated MESA Copyright

SCHEMA SCOPE

This document defines the information about Physical asset classes, physical assets, and physical asset capability tests that may be exchanged between business systems and manufacturing operations systems. This information is based on the data models and attributes defined in the ANSI/ISA 95.00.02 Enterprise/Control System Integration standard. Contact ISA (The Instrumentation, System, and Automation Society) for copies of the standard. Additional information on the standard is available at www.isa.org.

Key Information Assumptions

The data represented in these schemas is derived from the UML model below. This model is defined in the ANSI/ISA 95.00.02 standard. The information model in the model below is not hierarchical, so the key assumption is that the information may be accessed from any of three starting points: Physical Asset class, Physical Asset, or capability test, as identified by the dotted collections in the figure.

This schema uses a common schema for definition of elements that are used in multiple schemas, such as ID, Description, and Value. See the documentation of the common schema for definition of the common elements.

PhysicalAssetInformation

The main structuring element of the schema definition is PhysicalAssetInformation. Alternately, schemas may be made up a Physical Asset, Physical Asset class, or Physical Asset capability test specification document.

PhysicalAssetInformation elements define Physical Asset, Physical Asset classes, and/or Physical Asset capability test specifications.

PhysicalAsset

Physical Asset represents the elements of a PhysicalAsset hierarchy model defined in ANSI/ISA-95.00.01.

Physical Asset may be made up of other Physical Asset, as defined in Physical Asset hierarchy model.

PhysicalAsset elements may be used to contain information about specific PhysicalAsset. PhysicalAsset elements may also include the definition of capability test results.

PhysicalAssetClass

A PhysicalAsset class is a means to describe a grouping of PhysicalAsset with similar characteristics for purposes of scheduling and planning. Any piece of PhysicalAsset may be a member of zero or more PhysicalAsset classes.

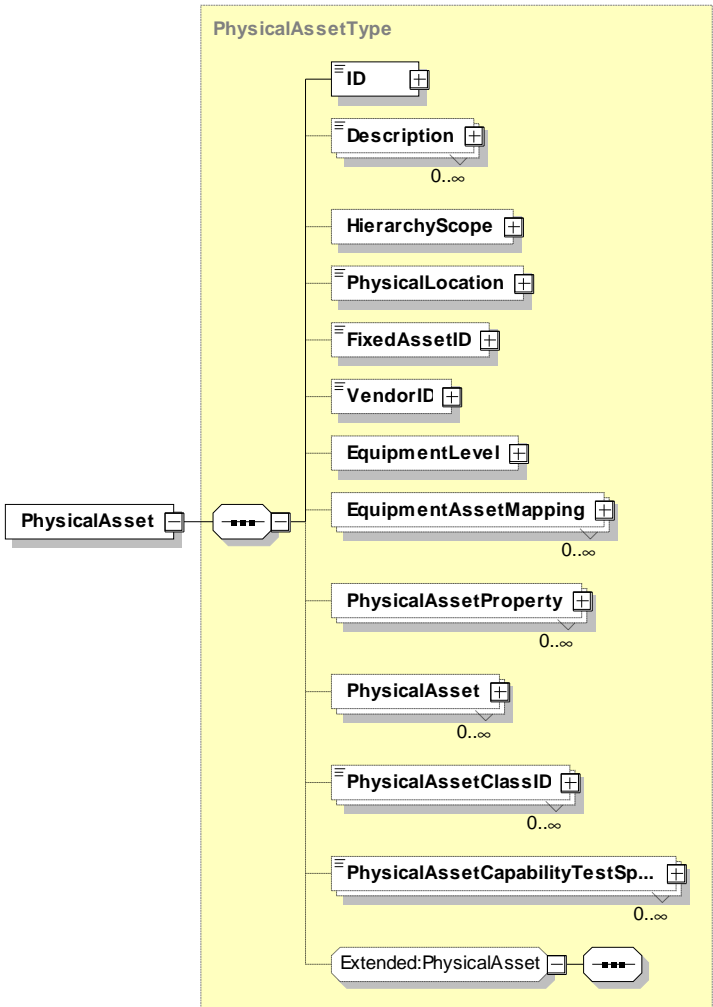

PhysicalAssetClass information may be used to contain information about classes of PhysicalAssets. It may contain the list of PhysicalAsset belonging to the class and the list of capability test specifications associated with PhysicalAsset class properties.

PhysicalAssetCapabilityTestSpecification

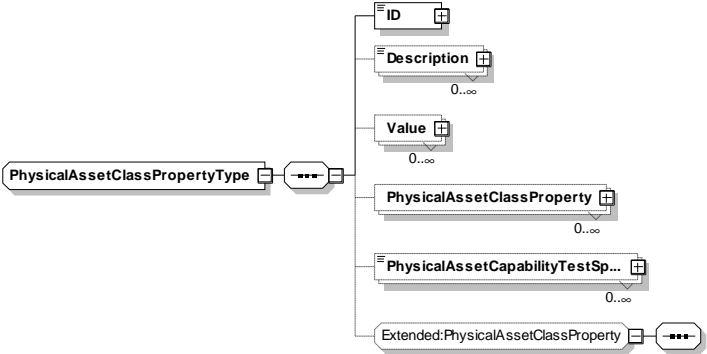

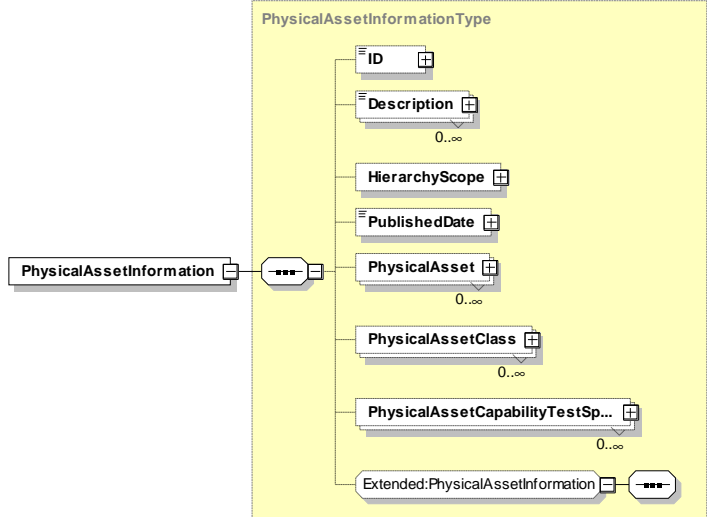

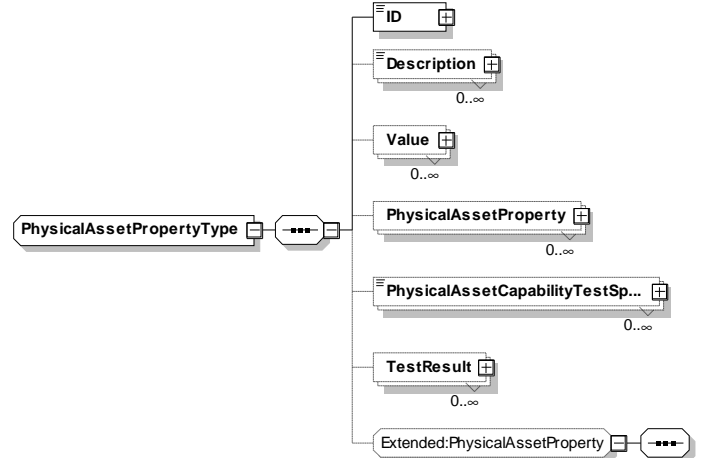

A Physical Asset capability test specification may be associated with a Physical Asset property. This is typically used where a test is required to ensure that the Physical Asset has the rated capability. A Physical Asset capability test specification may test for one or more Physical Asset properties.

PhysicalAssetCapabilityTestSpecification information may be used to contain information about Physical Asset capability tests. It may contain identifications of the tested Physical Asset properties and the tested Physical Asset class properties.

ELEMENT DEFINITIONS

Element/Type	Description
PhysicalAsset PhysicalAssetType	<p>A top-level object that may contain a definition of PhysicalAsset, containing PhysicalAsset, PhysicalAsset properties, the ID's of PhysicalAsset classes the PhysicalAsset belongs to, and the PhysicalAsset to physical asset mapping. May also contain application specific elements.</p>  <pre> classDiagram class PhysicalAssetType { ID Description HierarchyScope PhysicalLocation FixedAssetID VendorID EquipmentLevel EquipmentAssetMapping PhysicalAssetProperty PhysicalAsset PhysicalAssetClassID PhysicalAssetCapabilityTestSp... ExtendedPhysicalAsset } class PhysicalAsset PhysicalAssetType "0..*" -- "0..*" PhysicalAsset PhysicalAssetType "0..*" -- "0..*" EquipmentAssetMapping PhysicalAssetType "0..*" -- "0..*" PhysicalAssetProperty PhysicalAssetType "0..*" -- "0..*" PhysicalAssetClassID PhysicalAssetType "0..*" -- "0..*" PhysicalAssetCapabilityTestSp... PhysicalAssetType "0..*" -- "0..*" ExtendedPhysicalAsset </pre> <p>The diagram illustrates the structure of the PhysicalAssetType class. It contains several attributes: ID, Description (with a multiplicity of 0..*), HierarchyScope, PhysicalLocation, FixedAssetID, VendorID, EquipmentLevel, EquipmentAssetMapping (with a multiplicity of 0..*), PhysicalAssetProperty (with a multiplicity of 0..*), PhysicalAsset (with a multiplicity of 0..*), PhysicalAssetClassID (with a multiplicity of 0..*), PhysicalAssetCapabilityTestSp... (with a multiplicity of 0..*), and ExtendedPhysicalAsset. A PhysicalAsset class is shown with a multiplicity of 0..* and is associated with the PhysicalAsset attribute of PhysicalAssetType.</p>

Element/Type	Description
PhysicalAssetCapabilityTestSpecification PhysicalAssetCapabilityTestSpecificationType	<p>A top level object that contains the description of a PhysicalAsset capability test specification. Containing the name of the test, version of the test, description of the test, the list of class properties tested by the test, the list of specific PhysicalAsset properties tested by the test, and additional application specific information. May also contain application specific elements.</p>
PhysicalAssetClass PhysicalAssetClassType	<p>A top-level object that may contain a definition of a PhysicalAsset class, containing PhysicalAsset properties, and the ID's of PhysicalAsset the belonging to the class. May also contain application specific elements.</p>

Element/Type	Description
PhysicalAssetClassPropertyType <i>PhysicalAssetClassPropertyType</i>	<p>Contains a definition of a PhysicalAsset class property, consisting of an ID, a description, a nominal value, and any nested properties. May include the capability test specification.</p> 
PhysicalAssetInformation PhysicalAssetInformationType	<p>A top-level object that may contain a list of PhysicalAsset, PhysicalAsset class, and/or PhysicalAsset capability test specifications. May also contain application specific elements.</p> 
PhysicalAssetProperty PhysicalAssetPropertyType	<p>Contains a definition of a PhysicalAsset property, consisting of an ID, a description, a value of the property and any nested properties. May include the capability test specification and test result.</p> 

Element/Type	Description
TestedPhysicalAssetClassProperty <i>TestedPhysicalAssetClassPropertyType</i>	Contains a definition of a class property type tested by a qualification test specification. The ID defines the property.
TestedPhysicalAssetProperty <i>TestedPhysicalAssetPropertyType</i>	Contains a definition of a property type tested by a qualification test specification. The ID defines the property.
EquipmentAssetMapping <i>EquipmentAssetMappingType</i>	Defines the mapping of PhysicalAsset to a physical asset.

TRANSACTION ELEMENTS

The following elements are defined to support the ISA 95 Part 5 transactions, using the transaction data types defined in the B2MML-Common.xsd schema.

PhysicalAsset Information Elements	Description
GetPhysicalAssetInformation	Get <i>PhysicalAssetClass</i> , <i>PhysicalAsset</i> , and <i>PhysicalAssetCapabilityTestSpecification</i> definitions.
ShowPhysicalAssetInformation	Returned information from the <i>GetPhysicalAssetInformation</i> message.
ProcessPhysicalAssetInformation	Process <i>PhysicalAssetClass</i> , <i>PhysicalAsset</i> , and <i>PhysicalAssetCapabilityTestSpecification</i> definitions.
AcknowledgePhysicalAssetInformation	Returned status from the <i>ProcessPhysicalAssetInformation</i> message.
ChangePhysicalAssetInformation	Change <i>PhysicalAssetClass</i> , <i>PhysicalAsset</i> , and <i>PhysicalAssetCapabilityTestSpecification</i> definitions.
RespondPhysicalAssetInformation	Returned status from the <i>ChangePhysicalAssetInformation</i> message.
CancelPhysicalAssetInformation	Cancel <i>PhysicalAssetClass</i> , <i>PhysicalAsset</i> , and <i>PhysicalAssetCapabilityTestSpecification</i> definitions.
SyncPhysicalAssetInformation	Published <i>PhysicalAssetClass</i> , <i>PhysicalAsset</i> , and <i>PhysicalAssetCapabilityTestSpecification</i> definitions.

PhysicalAsset Class Elements	Description
GetPhysicalAssetClass	Get <i>PhysicalAssetClass</i> definitions.
ShowPhysicalAssetClass	Returned information from the <i>GetPhysicalAssetClass</i> message.
ProcessPhysicalAssetClass	Process <i>PhysicalAssetClass</i> definitions.
AcknowledgePhysicalAssetClass	Returned status from the <i>ProcessPhysicalAssetClass</i> message.
ChangePhysicalAssetClass	Change <i>PhysicalAssetClass</i> definitions.
RespondPhysicalAssetClass	Returned status from the <i>ChangePhysicalAssetClass</i> message.
CancelPhysicalAssetClass	Cancel <i>PhysicalAssetClass</i> definitions.
SyncPhysicalAssetClass	Published <i>PhysicalAssetClass</i> definitions.

PhysicalAsset Elements	Description
------------------------	-------------

PhysicalAsset Elements	Description
GetPhysicalAsset	Get <i>PhysicalAsset</i> definitions.
ShowPhysicalAsset	Returned information from the <i>GetPhysicalAsset</i> message.
ProcessPhysicalAsset	Process <i>PhysicalAsset</i> definitions.
AcknowledgePhysicalAsset	Returned status from the <i>ProcessPhysicalAsset</i> message.
ChangePhysicalAsset	Change <i>PhysicalAsset</i> definitions.
RespondPhysicalAsset	Returned status from the <i>ChangePhysicalAsset</i> message.
CancelPhysicalAsset	Cancel <i>PhysicalAsset</i> definitions.
SyncPhysicalAsset	Published <i>PhysicalAsset</i> definitions.

PhysicalAssetCapabilityTestSpec Elements	Description
GetPhysicalAssetCapabilityTestSpec	Get <i>PhysicalAssetCapabilityTestSpecification</i> definitions.
ShowPhysicalAssetCapabilityTestSpec	Returned information from the <i>GetPhysicalAssetCapabilityTestSpec</i> message.
ProcessPhysicalAssetCapabilityTestSpec	Process <i>PhysicalAssetCapabilityTestSpecification</i> definitions.
AcknowledgePhysicalAssetCapabilityTestSpec	Returned status from the <i>ProcessPhysicalAssetCapabilityTestSpec</i> message.
ChangePhysicalAssetCapabilityTestSpec	Change <i>PhysicalAssetCapabilityTestSpecification</i> definitions.
RespondPhysicalAssetCapabilityTestSpec	Returned status from the <i>ChangePhysicalAssetCapabilityTestSpec</i> message.
CancelPhysicalAssetCapabilityTestSpec	Cancel <i>PhysicalAssetCapabilityTestSpecification</i> definitions.
SyncPhysicalAssetCapabilityTestSpec	Published <i>PhysicalAssetCapabilityTestSpecification</i> definitions.

DIAGRAM CONVENTION

The schema diagrams using the following convention to illustrate the structure of the schema elements, the type of the elements and attributes, and the rules for optional elements and repetition.

About MESA: MESA promotes the exchange of best practices, strategies and innovation in managing manufacturing operations and in achieving operations excellence. MESA's industry events, symposiums, and publications help manufacturers achieve manufacturing leadership by deploying practical solutions that combine information, business, manufacturing and supply chain processes and technologies. Visit us online at <http://www.mesa.org>.

About the XML Committee: The XML Committee was formed within MESA to provide a forum for the development of the B2MML and BatchML specifications.
